**Universal T-Slot
Fixture -
Modular Tooling**

Innovative to the core

Specially designed to save you money

Patent-Pending Xzertz™ retractable dowel pin based T-Slot locator slides into place and is biased into the slot to hold it in place.

A standard grid pattern is established to accept the T-Slot locator.

Patent-pending Invert-A-Bolt™ Quarter-Turn T-Slot fastener slides into location in the T-Slot. This device is flush mounted below the surface of the fixture until ready for use. Only purchase the number needed for the operation. Ease of use and precision of the slots/ product facilitate modular type usage.
